

HARSHIT GOSWAMI

 github.com/harshitgoswami1 —  [linkedin.com/in/harshitgoswami1](https://www.linkedin.com/in/harshitgoswami1) —  harshit.gswmi@gmail.com

AI/ML engineering student with hands-on experience building LLM-powered systems and full-stack applications.
Seeking SWE / AI engineering roles where I can apply my skills in RAG, agentic AI, and backend development.

Experience

Software Development Intern

Feb 2026 – Present

Diarch

Bengaluru, India

- Engineered a **real-time communication layer** for the CRM using **Socket.io**, enabling low-latency chat functionality and instant data synchronization across organizational workflows.
- Architected a **full-stack communication platform** integrating **WebRTC** for high-fidelity video calling and multi-user conferencing features.
- Implemented **authentication systems and email integration** using JWT and Node.js middleware, cutting login-related bug reports by 50%.
- Designed **LLM-integrated backend services** enabling AI-assisted CRM features, reducing manual task completion time by ~20%.
- Delivered features across the **full stack**: React UI components, Express/Node.js APIs, and PostgreSQL schema design.

Projects

Law-Based Legal Assistant (RAG System)

github.com/harshitgoswami1/legal-rag

- Built a **legal knowledge retrieval system** using **RAG** to help lawyers query case law and statutes; indexed 500+ documents with sub-second retrieval latency.
- Implemented the RAG pipeline with **LangChain** for document ingestion, embedding generation, and semantic vector search via FAISS.
- Exposed query APIs via a **FastAPI backend**, enabling stateless LLM-based answer generation with citation sourcing.
- Designed a **React chatbot interface** supporting conversational search, reducing lookup time by ~60%.

Medical Diagnosis Consultation – Hierarchical Multi-Agent System

github.com/harshitgoswami1/TheConsultationSystem

- Designed a **supervisor-based Multi-Agent System** decomposing clinical diagnosis into parallel specialist tasks coordinated by a central CaseManagerAgent.
- Built **5 specialized sub-agents** using LangChain deepagents with shared workspace communication.
- Integrated Tavily API for real-time biomedical retrieval and a SynthesizerAgent producing differential diagnosis with confidence scores.
- Architected dynamic task delegation via LangGraph-style planning tools.

Skills

Languages: Python, JavaScript, Java, C/C++, SQL

Frontend: React, Next.js, TailwindCSS

Backend: Node.js, Express, FastAPI

AI / LLM: LangChain, LangGraph, RAG pipelines, Agentic AI

Databases & Infra: PostgreSQL, MongoDB, Redis, Docker, Git

Achievements

UDAYA 2.0 – National Level Hackathon, 1st Place

September 2025

Dayananda Sagar College of Engineering

- Won first place among **50** competing teams.
- Built an AI-powered solution which uses computer vision to detect falls in elder people and a smart alert system so that delay in help is reduced.

Education

Dayananda Sagar College of Engineering

Expected Jun 2027

B.E. in Artificial Intelligence and Machine Learning

GPA: 8.5 / 10

St. Anselms Pink City Sr Sec School (CBSE)

Jun 2022

Senior Secondary (Class XII)

Percentage: 94.6%
